

## Kalido Universal Information Director

The Kalido Universal Information Director (UID) works with the Kalido Dynamic Information Warehouse (DIW) to export business models from the data warehouse to Business Intelligence applications such as SAP BusinessObjects Designer and Microsoft SQL Server Analysis Services.

Kalido DIW is an adaptive, business model-driven system for preparing, implementing, and managing data warehouses. Kalido UID automates BI configuration when connecting one or multiple BI products to a data warehouse. Kalido UID brings the power of the Magnitude business model to drive BI tools throughout the enterprise, and helps to keep reports and analyses up-to-date with underlying changes to the warehouse.

The Kalido UID consists of the following software components:

- Model configuration logic and User Interface
- Integration Services, through which Kalido UID interacts with Kalido DIW core services to produce a metadata model
- Metadata bridge, which allows the model export to different Business Intelligence tools

### Kalido UID 11

#### Client

##### Platforms

Windows 8.1 Pro  
 Windows 10 Pro  
 Windows Server 2012 R2  
 Windows Server 201608R2

#### Business Intelligence Software

SAP BusinessObjects XIR3 (SP6 or later)  
 Microsoft Analysis Services 9  
 IBM Cognos 10.1 or 10.2
