

NoetixViews® for Oracle Grants

NoetixViews for Oracle Grants enables faster, easier and more cost effective access to information stored in the Oracle Grants database schema. More than 30 business views provide immediately usable and secure access to data stored in the underlying Oracle transaction database. This business layer provides a robust foundation to meet real-world Grants reporting requirements.

NoetixViews provides the functionality to track grants and funded projects from inception to billing and costing. Typical areas covered by the views include Grants Proposal, Multi-funded Projects, Award Management, Funds Control, Costing, and Billing. These views cover your configuration details in terms of flexfields. If you have implemented the multi-currency feature of Oracle Grants, you can view your transactions in transaction as well functional currencies.

Rapid Report Development in Oracle Grants

Designed in consultation with Oracle Grants Management users and industry experts, NoetixViews for Oracle Grants includes a broad range of performance-optimized views that cover complete functionality, extending the standard reporting solutions for Oracle Grants. NoetixViews enables end users and IT professionals to easily build queries using the relevant Grants data to meet the decision support needs for administering key functional, management planning and financial reporting processes. Detailed below is a sampling of functionality available for building reports using NoetixViews for Oracle Grants.

Oracle Grants Proposal

NoetixViews covers functionality from proposal creation to proposal budgets, funding details and assigning proposals and proposal budgets to awards. These views cover the status of a proposal in its workflow.

Oracle Grants Accounting

As funded proposals feed data to create awards and budgets, NoetixViews covers the flow of data from Award management, Project Funding, and Fund Control, to Billing, and Costing. The following areas have corresponding NoetixViews with in depth coverage for each area:

- ▶ **Awards** — Views in this subject area cover award details along with installments, supplements and amendment details to each award.
- ▶ **Award Distribution** — Views in this subject area cover distribution details in terms of expenditure and funding transactions.
- ▶ **Award Status Inquiry** — Views in this subject area cover budget, actual and encumbrance details giving an exact status of each award.
- ▶ **Award Billing** — Views in this subject area cover invoice transaction details with in Grants as well as shown in Accounts Receivables. These views help invoice reconciliation process.
- ▶ **Multi-funded Projects** — Views in this subject area cover details with respect to award to project relationship.
- ▶ **Costing** — Views in this subject area cover costing details both direct and indirect costs along with the account details as they get posted to GL.

Cross Functionality

NoetixViews for Oracle Grants would work as an extension to Oracle Projects if you have implemented Oracle Projects. In addition, there is cross functionality with Accounts Receivables and General Ledger. NoetixViews for Oracle Projects and NoetixViews for Oracle Grants would cover complete functionality beginning to end within Grants Management.

Generate Custom Business Views

At installation, NoetixViews automatically generates views to

reflect your unique application configuration. In addition, indexed columns, organization, and historical data are easily accessible.

Upgrade Protection

Reports developed directly against the Oracle E-Business Suite database risk expensive rework when the applications are upgraded. Noetix protects reports from these database schema changes by automatically remapping the new or changed table to the views to reflect these changes. This feature eliminates the need for expensive report maintenance and simplifies the report migration process.

Decreased Staffing Costs

NoetixViews minimizes the need for in-depth knowledge of the Oracle E-Business Suite data structure by providing fully documented views that solve specific business problems.
