Noetix® Education
Instructor-led Training

Noetix Education provides technical and end user training that enables our customers to maximize their Noetix investment. With training curriculums for both Noetix Administrators and business professionals, students will gain the knowledge and skills essential in developing custom reports and optimizing operational performance of Noetix tools and technologies.

Noetix offers on-site classes at a customer's location. On-site training is a popular option for organizations when a specific time frame for training is required, or when multiple staff members need training simultaneously. It also allows the specialization and dedicated expertise to focus on your organization's specific reporting environment and educational objectives.

Noetix Administrator Training

Noetix Administrators work side-by-side with Noetix consultants during implementation and user deployment, gaining direct experience with many operational activities. However, Noetix Administrator training doesn't end there. To keep up to date from both a technical and functional perspective, Noetix Education offers continuing education designed to help administrators ease system upgrades, optimize performance, and ensure end user satisfaction.

When staff turnover occurs, Noetix Education can also provide the ideal fast track to equip new Noetix Administrators with the essential skills and knowledge required to maintain a healthy reporting environment.

NoetixViews® Administration

The NoetixViews Administration course is an on-site class that covers how to effectively manage the NoetixViews environment, including installation, upgrades, and routine maintenance. Using a subset of your organization's current environment, Noetix

Administrators will gain the knowledge and the skills necessary to keep your NoetixViews installation current with your Oracle configuration. Learn how to implement standards and best practices, resulting in a more efficiently operating reporting solution.

Students will learn detailed "tips and tricks" essential to the routine operation and administration of NoetixViews. Training will provide best practices for generating and maintaining NoetixViews for use in multiple instances, in addition to managing user access to NoetixViews through reporting tools.

Noetix® Platform Administration

Essential to daily operation and performance, Noetix Platform is the hub of the Noetix reporting solution, integrating Oracle® E-Business Suite and other operational data into easy-to-use business views. For Noetix Administrators, learning how to effectively manage and operate this robust framework ensures high levels of end user satisfaction.

Noetix Administrators will gain the knowledge and skills necessary to manage and quickly extend standard Noetix content, and how to efficiently manage reporting users and their secure access to data stored in your database.

This course is essential for new Noetix Platform Administrators, recommended as an annual update for experienced administrators, and is helpful for reporting tool administrators, super users, and IT staff who must support Noetix servers and software and the underlying Oracle and Microsoft technologies.

NoetixViews Customization Certification

NoetixViews for Oracle E-Business Suite provides extensive content and query logic "out of the box" – quickly answering hundreds of business questions without the need for modification. As business needs change, NoetixViews can be modified to meet those changing business requirements. With NoetixViews

customization training, students will gain the knowledge and skills necessary to create view customizations following the approved methodology. This is a certification course, therefore successful completion of the course is dependent upon passing the NoetixViews Customization Certification exam.

Customizations created by Noetix Certified Professionals will be eligible for Noetix Customization Maintenance (NCM) — an optional service offering available through Noetix Support.

Business Professionals Training

To ensure successful rollout and user adoption, Noetix Education provides business analysts and related professionals with product training and hands-on workshops specially designed to increase their familiarity and use of Noetix reporting.

NoetixViews with Oracle® Discoverer

NoetixViews with Oracle Discoverer training is offered as a two-part course (NoetixViews with Oracle Discoverer — Level I and NoetixViews with Oracle Discoverer — Level II). Students may elect to take either course or both, based on skill level and familiarity with the tools.

NoetixViews with Oracle Discoverer — Level I introduces the skills and standards necessary for report development using Oracle Discoverer. This course is specifically tailored for those users who may not have an in-depth knowledge of the complex underlying Oracle architecture.

NoetixViews with Oracle Discoverer — Level II, presents the intermediate and advanced features of Oracle Discoverer to those business analysts and professionals who want to better understand the powerful analytical query capabilities of Oracle Discoverer.

NoetixViews with Noetix WebQuery®

NoetixViews with Noetix WebQuery training is offered as a two-part course (NoetixViews with Noetix WebQuery — Level I and NoetixViews with Noetix WebQuery — Level II). Students may elect to take either course or both, based on skill level and familiarity with the tools.

NoetixViews with Noetix WebQuery — Level I instructs business professionals how to develop and modify queries using Noetix WebQuery. This is an introductory course, intended for users who are unfamiliar with the Noetix reporting solution.

NoetixViews with Noetix WebQuery — Level II introduces business professionals with some knowledge of reporting using Noetix-Views and Noetix WebQuery to more advanced features required for custom reports based on complex queries.

NoetixViews with IBM® Cognos® BI

NoetixViews with IBM Cognos BI training is offered as a two-day course. Day one instructs business professionals how to develop and modify queries using NoetixAnswers™ in Cognos. The second day provides users with a hands on workshop environment that increases the knowledge and familiarity of Noetix with Cognos. This is an introductory course intended for users who are unfamiliar with the Noetix reporting solution with Cognos.

NoetixViews with Oracle® Business Intelligence Enterprise Edition

NoetixViews with Oracle Business Intelligence Enterprise Edition (OBI EE) training is offered as a two-day course. Day one instructs business professionals how to develop and modify queries using NoetixAnswers in OBI EE. The second day provides users with a hands on workshop environment that increases the knowledge and familiarity of Noetix with OBI EE. This is an introductory course intended for users who are unfamiliar with the Noetix reporting solution with OBI EE.

NoetixViews with SAP® BusinessObjects™

NoetixViews with SAP BusinessObjects training is offered as a two-day course. Day one instructs business professionals how to develop and modify queries using NoetixAnswers in Business Objects. The second day provides users with a hands on workshop environment that increases the knowledge and familiarity of Noetix with BusinessObjects. This is an introductory course intended for users who are unfamiliar with the Noetix reporting solution with BusinessObjects.
