

Access, Analyze & Act on trusted data.

With more than 20 years of experience, we help companies make use of the right data to derive trusted corporate performance insights.

- Access data wherever it is – in any system and any format
- Analyze data – by harmonizing, governing and preparing data so it is both reliable and presented in a form where it can be easily understood
- Act – on insights from that data for strategic and operational benefit.

Magnitude Software, Inc. powers corporate performance insights by enabling companies to access, analyze and act on the right data.

The growth, complexity and fragmentation of cloud and hybrid environments, multiple ERPs, Big Data, self-service BI and data creation present tremendous challenges for businesses to make better, faster, informed decisions as they look to answer questions like these:

Which products have highest customer satisfaction?

How can we close the books faster?

How do I satisfy auditors' requests for information?

Magnitude empowers companies to derive critical insights for better Corporate Performance Management (CPM).

We help customers harness their expanding data sources within heterogeneous environments, from ERP and operational systems to Big Data. This requires technology to capture data, processes to harmonize and govern it, and expertise to put it together in the right ways to make it usable, useful and meaningful. We are the only company with the end-to-end solution set to do so.

Magnitude leads the way in delivering corporate performance insights through reporting and analytics, master data management (MDM) and data connectivity in heterogeneous environments. Our software and solutions drive real business results for hundreds of thousands of users around the globe.

Magnitude's solutions span the full data lifecycle – from source to harmonization and governance through reporting and analytics – to enable trusted business insights.

Magnitude CPM

We are the standard for delivering insights on Oracle Applications

Performance Reporting

Built with over 20 years of experience, Magnitude Noetix and RapidDecision products lead the way in providing CPM insights from Oracle applications, and beyond.

Magnitude MDM

Multi-domain + model-driven from inception — ahead of the pack

Data Quality + Harmonization

This model-driven, multi-domain solution features a Harmonization module along with data warehouse automation software.

Magnitude Connectivity

All leaders in the Gartner BI MQ choose us as their connectivity standard

Easy Access to Any Data & Insight

Seamless, standards-based connectivity to a wide variety of business applications and data sources, on-prem, in the cloud, NoSQL and Big Data.

LOCATIONS

North America:

Austin, TX (HQ); Burlington, MA; Cheshire, CT; Redmond, WA; Vancouver, BC

International:

London, UK; Hyderabad, India; Bangalore, India
